The image shows a screenshot of a web browser's developer console. The console is open to the 'Console' tab, which is highlighted in blue. The console displays a JavaScript code snippet that defines a variable 'number' with the value 5, creates a constant 'counter' with the value 5, and then enters a 'for' loop that iterates from 'i = 1' to 'i <= counter'. Inside the loop, 'console.log' is used to print the string '^=,=^'. The console shows the output of the loop as five instances of '^=,=^', each preceded by a blue circle containing the number 5. The console also shows the output 'undefined' at the end of the code block. The console's toolbar at the top includes icons for opening the console, zooming, and filtering, as well as a 'Filter' input field and a 'Default levels' dropdown. The console's status bar at the bottom indicates 'No Issues' and provides a link to 'VM251:4'.

```
> var number =5;
const counter = 5;
for (i = 1; i <= counter;i++){
  console.log ("^=,=^");
}
5 ^=,=^
5 ^=,=^
5 ^=,=^
5 ^=,=^
5 ^=,=^
< undefined
